

**AMENDMENTS TO THE CLAIMS:**

This listing of claims will replace all prior listings of claims in the application.

Listing of Claims:

1. (Currently Amended) A resin tank comprising:

a tank body for reserving a liquid, the tank body being made of resin, the tank body having at least a circular hole formed by a stepped portion that connects with an inside of the tank body, the stepped portion having the same thickness as the tank body;

a pipe sealing member having a closely fitting portion which is closely fitted into the circular hole; and

a pipe installed in the pipe sealing member, the pipe and the pipe sealing member having a concentric circle with each other,

wherein an outer diameter of the pipe sealing member increases stepwise and then decreases continuously from the closely fitting portion toward the inside of the tank body.

2. (Original) The resin tank according to claim 1, wherein the pipe is detachable from the pipe sealing member.

3. (Original) The resin tank according to claim 1, wherein the pipe is integrally molded with the pipe sealing member.

4. (Original) The resin tank according to claim 1, wherein the pipe sealing member has at least a pipe fitting hole.

5. (Original) The resin tank according to claim 4, wherein the number of the pipe fitting holes is plural.

Serial No. 10/759,843  
Response Dated July 6, 2006  
Reply to Office Action of April 6, 2006

Docket No. 5095-4082

6. (Previously Presented) The resin tank according to claim 4, wherein the pipe sealing member is made of elastic, the closely fitting portion and the pipe fitting hole having a concentric circle with each other.

7. (Original) The resin tank according to claim 1, wherein the resin tank is an oil tank for use in a loading apparatus of an industrial vehicle.

8. (Original) The resin tank according to claim 1, wherein the pipe is made of metallic material.
